

Project Door Hardware

The German owned Gretsch-Unitas Group is one of the world's largest manufacturers of architectural hardware. We have been designing and manufacturing innovative window and door hardware products for over 100 years. Our BKS brand is a household name in Germany associated with high quality door security locks and cylinders.

All of our products meet European specifications and are manufactured to the highest standards.

This brochure shows just a small selection of our project door hardware, especially designed for the Asian market. The emphasis on our products is reliability, function and of course, value for money. For more detailed information, please refer to our detailed catalogues shown on the back page of this brochure.
